

## **Master degree In Health Promotion**

The purpose of this master's degree programme is to train students to become health promotion specialists, prepared to participate in health promotion practice and research, and to use the findings of research to improve the quality and effectiveness of health promotion action. Students who complete the two-year programme are awarded the degree Master of Philosophy. This master's degree programme offers two specialisation tracks within health promotion. European students may wish to elect the European Dimension in Health Promotion Track. Students from outside Europe may wish to elect the International Health Track, which focuses on health promotion in non-Western cultures. All students are however free to elect either track, or to custom design a specialty track in collaboration with the programme director, in cases where the student has special needs. European students that complete the European Dimension Track be certified as having met the requirements of the European Master's in Health Promotion (EUMAHP) programme. The programme requires four semesters of full time study, earning 120 ECTS. The period of study is 10 months a year.
