THE AIMS OF THE WORKSHOP AT A GLANCE

The SYNERGY annual workshop is organised to provide an opportunity for discussion between health psychologists conducting research in core fields within health psychology.

The focus is on advancing the standard of work within the field by pooling expertise, sharing critical evaluations, and stimulating networking and collaborative research between researchers from all over Europe in an informal and supportive atmosphere. It is also an opportunity for researchers to present their research for discussion in depth with other experts working in the same field in a friendly and relaxed atmosphere.

Details of articles of Synergy and the past year Synergy workshops can be found at: <http://ehps.net/synergy/1024/index.html> and at <http://ehps.net/1024/index.html>

* In your proposal you should present the title of the workshop, the relevance of it, ideas about the programme as well as the name(s) of the organiser(s) and facilitator(s).
