AMAZING
Thailand
Enchantment for the Next Thousand Years

Invitation, Call for Abstract and Registration

On behalf of the Thai Society of Behavioural Medicine (TSBM), the National Institute for Child and Family Development and the Neuro-Behavioural Biology Center, Institute of Science and Technology, Mahidol University, Thailand, and the Organizing Committee, we cordially invite you to attend and participate in the Fourth Annual International Conference of Thai Society of Behavioural Medicine which is held jointly with the Second Asian Regional Conference of Behavioural Medicine, and the Meeting of the International Society of Behavioral Medicine (ISBM) Executive Committee and Governing Council at the Siam City Hotel in Bangkok, Thailand between December 6- 9, 2004.

The Scientific Program Committee and the Local Organizing Committee have invited many leading authorities and experts in behavioural medicine and related disciplines from around the world and many Asian countries to deliver exciting and cutting edges keynote plenary lectures, symposia, workshops, master dialogues/debates and focus groups. Topics include current research and practice in behavioural medicine with also special focuses on health problems in Asia. We encourage members of TSBM, ISBM, and all those who are doing research or practicing, and interested in behavioural medicine, medical and graduate students to actively participate in the conference by submitting abstract(s) of your latest research findings, and registration to the conference.

We look forward to welcoming you to the Amazing Thailand for exciting scientific conference and experiencing our Thai hospitality.

Nittaya J, Kotchabhakdi M.D.
President of TSBM and Director of NICFD
& Naiphinich Kotchabhakdi Ph.D.
Secretary General of TSBM
and Chairman of the Organizing Committee

Bangkok, the capital of Thailand, is one of the worlds most well known destinations for travelling either for business or pleasure. Thailand is also known as **“the land of smile and unique hospitality”**, and good blend and harmony of all religious vibrant cultures, arts, and modern facilities for living accommodation. Thai food and cuisine are also among the world most popular and nutritious. Abundance of museums, temples, art galleries, and fascinating shopping and comfortable hotels make it very tempting and convenient for you to bring your family and/or accompanying travel companions to enjoy the visit to **“the Amazing Thailand”**. Locating in the central part of Southeast Asia, it is conveniently connected to most parts of the world by all major airlines, and Thai International Airline will be ready to help plan and facilitate your traveling.

Scientific Program:

The Scientific Program will include Keynote Plenary Lectures, Symposia, Workshops, and Master dialogues/Debates, Conferences of Focus Groups, Oral and Poster Presentations. Authorities and experts in behavioural medicine and related disciplines from around the world will organize the lectures, symposia and workshops. The Asian Regional conference addresses behavioural medicine and health problems in Asia, and also discusses behavioural intervention and changes in life styles as measures for therapy and health promotion. In addition, pre- and post-conference Teaching-Training Workshops provided opportunities for students to meet with experts.
